the designs on Invision using React.JS and implemented state management using Redux and API integration using Redux Saga. Also, I contributed to the back end development using Node.js, Mongoose, Express.js, Redis. Furthermore, I implemented integration with various third party services such as SurveyGizmo, ActiveCampaign, GTM, Cron Jobs, Cohesion DB, Neilson DMP, etc.

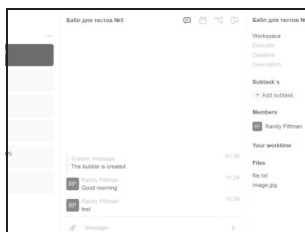

Home page

Product Page

Vue / Laravel

This is a universal planning tool with a web interface and mobile application.
I created all parts of this service from scratch, including DevOps with automated CI/CD and docker images; backend on Laravel; frontend on VueJS; mobile application on Ionic 4 and Capacitor.

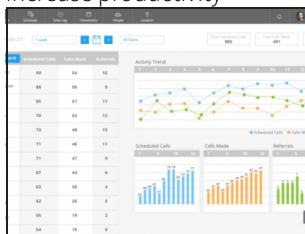

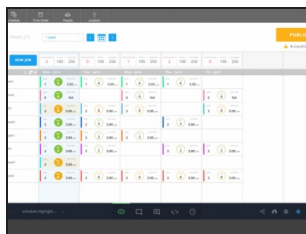

Universal Planning Tool

MEAN development

Web(Angular6)&Mobile(React Native) app with Node on the Back-end.
I was involved on all stages of development as a Full-Stack(Angular 6+ .Net) developer.

The app allows to physically and digitally manage the complete operational process of a company to ensure that each step in the workflow is covered. Whether a company is a home health agency, private practice liaison or long-term acute care (LTAC) hospital Zurvus Solution will fully automate the workflow process internally, minimize human error, and increase productivity
